Part 3 - Proposed Restocking

We normally expect the area felled to be restocked unless you are only thinning. Under the Forestry Act 1967 as amended, we usually attach conditions to the licence to secure restocking. We will discuss these conditions with you and will require your formal agreement to the conditions before the licence is issued. With reference to the Felling operations table (Part 2), please provide information about your proposal for restocking each area where felling is taking place. You should show these proposals on a map.

The table below details the restocking specification for each of the felled areas:

Restocking Operations
